INDEX

Page

Absorption of Carbon by the Roots of Plants: J. F. Breazeale 303-311
Acer negundo, red stain in 449-458
Acetaldehyde, testing for rancidity 330
Acetic acid, testing 329
Acidity—
  cream, relation to feathering in coffee 543-546
  Rhizopus spp., and pectinase production 369-370
  soil, origin, causes, measurements 114-119
Acids—
  chufa oil 78-82
  production and examination 326-333, 369-371, 493
Acrolein, examination and reaction with hydrogen peroxid 335-336, 338, 348, 360
Action of Sodium Nitrite in the Soil: R. H. Robinson 1-7
Active Chlorin as a Germicide for Milk and Milk Products: Harrison Hale and William L. Bleecker 375-382
Adsorption, comparison with absorption, demonstration of process 84, 114, 117
Agrotis aquilina disease, observations in Italy 487
Aldehydes, unsaturated, examination in rancidity studies 335-336
Alfalfa, destruction by root rot, and reestablishment 405-408, 412
Allen, Ruth F.: Cytological Studies of Infection of Baart, Kanred, and Mindum Wheats by *Puccinia graminis tritici*, Forms III and XIX 571-604
Almond oil, earth 77
Alumino-silicates, acidity caused by weathering 115-117
Amitermes spp., description and habits 291-293
Ammonia, use as refrigerant 185, 190
Anoplotermes gracilis, description and habits 299-300
Ants—
  enemies of false wireworm 562
  termites 287, 294, 296
  white. *See* Termites 279-302
Apanteles congregatus, parasitism on hornworms 484
Apple scald, control by oiled wrappers, oils, and waxes 513-536
Apricot, tumor, new 45-60
Aralia cordata Thunb., two diseases of 271-278
Arsenate of lead, colloidal, preparation and properties 373-374
Aspergillus niger, penetration into wood, studies 220, 223, 225, 227
Autoclaving, effect on toxicity of cottonseed meal 9-10
Auxotaxic Curve as a Means of Classifying Soils and Studying Their Colloidal Properties: A. E. Vinson and C. N. Catlin 11-13
Avocado trees, termites, occurrence 287, 289, 290, 298
Azelaic acid, from rancid fats, examination 323, 325, 326, 328
Azelaic, half aldehyde, testing for rancidity 326, 330
Baart wheat, stemrust infection, cytological studies 573-579, 592-594, 597-601
Bacillus—
  acridiorum—
    cause of grasshopper disease, comparison with *B. sphingidis* 482-483, 485, 492, 495
    comparison with *B. noctuarum* 492, 495
  coli communis, destruction by chlorin 376-381
  noctuarum—
    cause of cutworm septicemia 488-491
    comparison with *B. sphingidis* and *B. acridiorum* 492, 495
    transmission method 494
  sorghi, cause of sorghum blight, comparisons 157-158

Page

Bacillus—Continued.
  sphingidis—
    cause of hornworm septicemia 478-483
    comparison with *Bacillus acridiorum* 482-483, 485, 492, 495
    noctuarum 492, 495
    transmission methods 484
Bacteria, milk, destruction by chlorin 375-382
Bacterial Stripe Disease of Proso Millet: Charlotte Elliott 151-160
Bacterium—
  andropogoni, cause of broomcorn disease 158
  tumefaciens, crowngall organism, morphology 425-436
Bacto-purple lactose agar, composition 380
Barley, susceptibility to infection by *Helminthosporium sativum* 198, 204, 216
Baughman, Walter F., and Jamieson, George S.: The Constituents of Chufa Oil, a Fatty Oil from the Tubers of *Cyperus esculentus* Linné 77-82
Bean weevil, four-spotted, biology notes 609-616
Beans, seedling growth, relation to temperature and initial weight of seeds 537-539
Beeswax, use on apples to control scald, formulas 529-531
Beets—
  mother, time for testing 125-130
  stored, loss of sugar, tests 126-149
Bibliography—
  Coleoptera 565-566
  otocephaly 180-181
  rancidity 360-362
  soil acidity 120-123
  wheat rusts 602-604
Biological Notes on the Termites of the Canal Zone and Adioining Parts of the Republic of Panama: Harry F. Dietz and T. E. Snyder 279-302
Biology of the False Wireworm *Eleodes suturalis* Say.: J. S. Wade and R. A. St. George 547-566
Birds, enemies of false wireworm 562
Blaps suturalis, same as *Eleodes suturalis* 548
Bleecker, William L., and Hale, Harrison: Active Chlorin as a Germicide for Milk and Milk Products 375-382
Blight, sorghum, description, and comparisons 157-158
Bliss, C. I., and Runner, G. A.: The Three-Banded Grape Leafhopper and Other Leafhoppers Injuring Grapes 419-424
Borer, oak sapling—
  food plants and control 316, 317
  Goes tesselatus 313-318
Botrytis spp., effect on cell walls of plants 594, 595, 598
Bowen, John T.: A Method of Automatic Control of Low Temperatures Employed by the United States Department of Agriculture 183-190
Boxelder, red stain in the wood 449-458
Breazeale, J. F.: The Absorption of Carbon by the Roots of Plants 303-311
Breeding, guinea pigs, experiments 163-180
Brine, use as refrigerant 183, 190
Brinley, F. J.: Preparation and Properties of Colloidal Arsenate of Lead 373-374
Brooks, Charles, Cooley, J. S., and Fisher, D. F.: Oiled Wrappers, Oils, and Waxes in the Control of Apple Scald 513-536
Brooks, Fred E.: Oak Sapling Borer, *Goes tesselatus* Haldeman 313-318
Broom corn, bacterial disease, description and comparisons 157-158
Bruchus quadrimaculatus, biology notes 609-616

Budrot— Page
cherry, origin from *Fusarium gemmiperda* . 507
peach, origin from *Fusarium* species..... 507-512
Budrot of the Peach Caused by a Species of *Fusarium*: John W. Roberts..... 507-512
Bud Selection as Related to Quantity Production in the Washington Navel Orange: A. D. Shamel, R. E. Caryl, and C. S. Pomeroy..... 319-322
Bud selection, navel orange, relation to quantity production..... 319-322
Buds, unproductive limb of navel orange, progeny tests..... 320-322
Bud variations, progeny tests in citrus propagation..... 319-320
Buildings, injury by termites in Canal Zone. 279, 283, 288-289, 294, 297, 301
Burgwald, L. H.: Some Factors Which Influence the Feathering of Cream in Coffee. 541-546
Butyric acid, rancid fat, examination..... 329
aldehyde, examination..... 3-30
Cadelle, life history and habits..... 61-68
Calcium—
adsorptions, relations of soil reaction..... 83-123
hypochlorite, action as germicide for milk..... 378-381
losses from soils by weathering, cause of acidity..... 115, 116
salts, effect on soil acidity, experiments... 91-114
Calf raising, milk requirement minimum... 437-446
California, bean-weevil investigations..... 609-616
Calves—
blackleg, testing spinal fluids..... 500, 501, 502
feeding after weaning, composition of feeds..... 437-438
growth on hay and grain feeds after weaning..... 439-446
Canal Zone termites, biological notes..... 279-302
Caproic acid from rancid fats, examination... 329
Caprylic acid from rancid fats, examination.. 328
Carbon, absorption by roots of plants..... 303-311
Carbonates, absorption by plants from nutrient solutions..... 307-310
Carotin—
determination by means of the spectrophotometer and colorimeter..... 383-400
methods, comparison..... 397-399
solutions transmittancy, effect of solvents 391-393
special transmittancy with helium and mercury light..... 387-394
Carrots, sources of pure carotin..... 393
Caryl, R. E., Shamel, A. D., and Pomeroy, C. S.: Bud Selection as Related to Quantity Production in the Washington Navel Orange..... 319-322
Catlin, C. N., and Vinson, A. E.: The Auxotaxic Curve as a Means of Classifying Soils and Studying Their Colloidal Properties.. 11-13
Ceratostomella, sp., penetration into wood, studies..... 220, 223-224, 225-227
Chemical Analysis of *Jatropha stimulosa*: Paul Menaul..... 259-260
Chemical Examination of "Chufa," the Tubers of *Cyperus esculentus* Linné: Frederick B. Power and Victor K. Chesnut..... 69-75
Cherry—
budrot, origin from *Fusarium gemmiperda*. 507
inoculation with *Fusarium gemmiperda*, results..... 510-511
Chesnut, Victor K., and Power, Frederick B.: Chemical Examination of "Chufa," the Tubers of *Cyperus* Linné..... 69-75
Chickens, enemies of termites..... 287-294
Chigger, North American, distribution and nomenclature..... 401-403
germicide for milk and milk products.... 372-382
Chlorin—
germicidal action in water..... 375
Chlorin water, action of germicide for milk. 378-381
Chufa—
beverage..... 69, 70
oil—
chemical constituents..... 77-82
uses and description..... 69, 71
tubers, chemical examination..... 69-75
Citrus propagation, bud selection importance..... 319-322
Coffee—
acidity, in different cooking methods and different grades..... 541-542
Coffee—Continued. Page
cream feathering, factors influencing..... 541-546
substitute, chufa tubers as..... 69
Colletotrichum lindemuthianum, effect on cell walls of plants..... 595, 598
Colloidal arsenate of lead, preparation and properties..... 373-374
Colloidal gold test, dourine..... 499-500
Colloids, soil, study by means of auxotaxic curve..... 11-13
Colorado, false wireworms in..... 549
Colorimeter, use in determining carotin.... 395-397
Common Earthenware Jars a Source of Error in Pot Experiments: J. S. McHargue.... 231-232
Complement fixation tests—
of serum for dourine..... 498
of spinal fluids, horse and calf..... 502
Compounds Developed in Rancid Fats, with Observations on the Mechanism of Their Formation: Wilmer C. Powick..... 323-362
Constituents of Chufa Oil, a Fatty Oil from the Tubers of *Cyperus esculentus* Linné: Walter F. Baughman and George S. Jamieson..... 77-82
Cooley, J. S., Brooks, Charles, and Fisher, D. F.: Oiled Wrappers, Oils, and Waxes in the Control of Apple Scald..... 513-536
Coptotermes niger, description and habits.. 285-288
Cotton, Richard T.: Notes on the Biology of the Cadelle, *Tenebroides mauritanicus* Linné 61-68
Cotton, rootrot fungus, habits..... 405-418
Cottonseed—
meal, toxicity, effect of autoclaving..... 9-10
oil, solutions, spectra..... 337
poisonous constituent, isolation and studies 233-237
Cowpea, food of four-spotted bean weevil.. 609-616
Cream—
acidity, relation to feathering in coffee... 543-546
feathering in coffee, some factors influencing..... 541-546
mixing with coffee, methods affecting curdling, and experiments..... 542, 543, 545
treatment for feathering in coffee..... 543, 544, 545
Crowngall—
caused by *Bacterium tumefaciens*, comparison with apricot tumor..... 47, 58
organism, morphology..... 425-436
Cryoscopic readings, potato juices..... 244-256
Cryptotermes thompsonae, description and habits..... 284
Cutworm Septicemia: G. F. White..... 487-496
Cutworms—
inoculation with *Bacillus noctuarum*..... 490, 495
septicemia..... 487-496
susceptibility to hornworm septicemia....482, 485
Cyperus esculentus..... 69-75
Cytological Studies of Infection of Baart, Kanred, and Mindum Wheats by *Puccinia graminis tritici* forms III and XIX: Ruth F. Allen..... 571-604
Decay, fruits and vegetables, caused by *Rhizopus nigricans*, note on..... 363
Dew, relation to arsenical injury of plant. 192-194
Dietz, Harry Frederic, and Snyder, T. E.: Biological Notes on the Termites of the Canal Zone and Adjoining Parts of the Republic of Panama..... 279-302
Dihydroxyacetone, examination..... 340
Dihydroxystearic acid, examination and testing..... 327
Diketostearic acid examination and testing 326, 327
Dourine—
pathology of spinal cord in..... 497-505
post-mortem findings..... 497-498
study of serology, cerebrospinal fluid, and changes in spinal cord..... 497-505
Dowell, C. T., and Menaul, Paul: Effect of Autoclaving upon the Toxicity of Cottonseed Meal..... 9-10
Dungan, G. H., Webb, R. W., Leighty, C. E., and Kendrick, J. B.: Varietal Resistance in Winter Wheat to the Rosette Disease.. 261-270
Earth-almond oil..... 77
Eaton, Orson N., and Wright, Sewall: Factors Which Determine Otocephaly in Guinea Pigs..... 161-182
Eckerson, Sophia H., McKinney, H. H., and Webb, R. W.: The Intracellular Bodies Associated with the Rosette Disease and a Mosaiclike Leaf Mottling of Wheat..... 605-608

Page

Effect of Autoclaving upon the Toxicity of Cottonseed Meal: C. T. Dowell and Paul Menaul 9-10
Eggplant, Leaf-Miner *Phthorimaea glochinella* Zeller: Thomas H. Jones 567-570
Electric wiring for temperature-control system, diagram 186
Electrode, hydrogen, use in measurement of soil acidity 84-87, 91
Eleodes—
spp., comparison with *Eleodes suturalis* .. 548-549
suturalis, description, distribution, life history, and development 547-566
Elliott, Charlotte: A Bacterial Stripe Disease of Proso Millet 151-160
Ellms and Hauser test for free chlorin 375
Embaphion muricatum, characters 555
Epihydrin aldehyde, formation, sources, color observations, and odors 344-359, 360
Erysiphe spp., effect on cell walls of 595, 597, 598
Erythroneura spp, relationships 419-420
Eutermes spp. in Canal zone 291
Ewing, H. E.: Our Only Common North American Chigger; Its Distribution and Nomenclature 401-403
Excretions from Leaves as a Factor in Arsenical Injury to Plants: C. M. Smith 40, 191-194
Factors Which Determine Otocephaly in Guinea Pigs: Sewall Wright and Orson N. Eaton 161-182
Fairy rings, fungi forming, note on 415
Fats, rancid, compounds developed, and mechanism of their formation 323-362
Feeds, calf, after weaning, composition of .. 437-438
Fish, poisoning with gossypol 235-236
Fisher, D. F., Brooks, Charles, and Cooley, J. S.: Oiled Wrappers, Oils, and Waxes in the Control of Appie Scald 513-536
Five Molds and Their Penetration into Wood: Eloise Gerry 219-230
Formad, Robert J., and Schoening, Harry W.: A Study of the Serology, the Cerebrospinal Fluid, and the Pathological Changes in the Spinal Cord in Dourine 497-505
Formaldehyde, testing for rancidity 330
Formic acid, testing 329
Fungi—
cause of rots of peas 459
injurious to false wireworms 561
Fungus, cotton rootrot, habits 405-418
Furniture, injury by termites 283, 284, 285, 294
Further Observations on the Osmotic Pressure of the Juices of the Potato Plants: B. F. Lutman 243-256
Fusarium—
gemmiperda, description and reaction to culture media 508-510
martii var. *pisi*, description, cultural characters, physiology 459-469
negundi, cause of red stain of boxelder, description, life history causes 451-456
oxysporum, testing for pathogenicity 473
redolens, testing for pathogenicity 473
sclerotioides, testing for pathogenicity 473
solani, testing for pathogenicity 473
spp.—
cause of stemrot and rootrot of peas 459-476
growth on culture media characteristics .. 509
isolation from diseased peas, pathogenicity 472-474
vasinfectum, testing for pathogenicity 473
Galls—
apricot, cause and description, infection, and control work 45-48, 52-58
from *Bacterium tumefaciens* inoculation, development, details 425-430
Gelatin, use in preparation of colloidal arsenate of lead 373
Gelechia spp., synonyms of *Phthorimaea glochinella* 567
Germicide, milk, and milk products, active chlorin 375-382
Germination, *Rhizopus nigricans* strains, temperature relations 365-369
Gerry, Eloise: Five Molds and Their Penetration into Wood 219-230
Globulin test, horses and calves 501
Glyceric aldehyde, examination 339
Goes tesselatus Haldeman, technical description and distribution 315-316

Page

Gossypol, physiological effect of 233-237
Grain mixtures for calf feeds, composition and amounts per head 438, 445-446
Grapes—
leafhoppers injurious to 419-424
spraying for leafhoppers 424
Greenhouses, temperature charts, description and illustration 188-190
Guinea pigs, otocephaly in, factors determining 161-182
Habits of the Cotton Rootrot Fungus: C. J. King 405-418
Hale, Harrison, and Bleecker, William L.: Active Chlorin as a Germicide for Milk and Milk Products 375-382
Harter, L. L., and Weimer, J. L.: Some Physiological Variations in Strains of *Rhizopus nigricans* 363-371
Heartrots, boxelder, association with red stain 449-450
Helminthosporium sativum, infection of wheat seedlings, studies 195-218
Hemoglobin, absorption spectra, effect of gossypol 233
Heptylic acid from rancid fat, examination 328
Heptylic aldehyde, examination, and formation 329, 356-358, 359
Homogenizing cream, effect on feathering in coffee 543, 545
Horchata de chufa 69, 70
Hornworm Septicemia: G. F. White 477-486
Hornworms inoculation—
with *Bacillus sphingidis*, experiments 477, 480-481, 485
with cutworm septicemia 490, 495
Horses—
blood and spleen in infectious anemia iron content 239-242
dourine of, studies of serology spinal fluid and spinal cord 497-505
Hubert, Ernest E.: The Red Stain in the Wood of Boxelder 447-458
Hydrochloric acid, effect on soil acidity and calcium content, experiments .. 98-99, 104-105, 113
Hydrogen, electrode use in measurement of soil acidity 84-87, 91
Hydrogen-ion concentration of *Rhizopus* spp., and pectinase production 369-370
Hydrogen peroxid and acrolein, reaction between 338-348
Hydroxystearic acid, examination and testing 327
Ice cream, chlorin as germicide 375, 381
Influence of Soil Temperature and Moisture on Infection of Wheat Seedlings by *Helminthosporium sativum*: H. H. McKinney 195
Influence of Temperature and Initial Weight of Seeds upon Growth Rate of *Phaseolus vulgaris* Seedlings: Willem Rudolfs 537-539
Inoculation, apricots with *Monochaetia* sp. experiments 52-54
Insect enemies of false wireworms 562
Intracellular Bodies Associated with Rosette Disease and a Mosaiclike Leaf Mottling of Wheat: Harold H. McKinney, Sophia H. Eckerson, and Robert W. Webb 605-608
Iowa, false wireworms in 549
Iron Content of Blood and Spleen in Infectious Equine Anemia: Lewis H. Wright 239-242

use in control of apple scald ... 513–531
vegetable, spectra of solutions studies ... 337
Oklahoma, false wireworms in ... 550
Oleic acid—
oxidation studies ... 324–326
ozonid, preparation and examination ... 331–333
products examination ... 326–331
rancid fractionation and distillation ... 349, 350, 351
Onion, bulb scales, infection with stemrust ... 598
Orange, Washington navel, bud selection, relation to quantity production ... 319–322
Ortho-tolidin, test for free chlorin ... 375–377
Otocephaly, in guinea pigs, factors ... 161–182
Our Only Common North American Chigger; Its Distribution and Nomenclature: H. E. Ewing ... 401–403
Oxalic acid, effect on soil acidity and calcium content ... 99–100, 114
Ozonium omnivorum, causing cotton rootrot, habits ... 405–418
Pack, Dean A.: Time for testing mother beets ... 125–150
Panama, termites in, biology of ... 279–302
Paraffin, use in apple scald ... 513, 514, 519, 521
Pasteurizing cream, effect on feathering in coffee ... 544, 545
Peach—
budrot, origin from Fusarium species ... 507–512
inoculation with *Fusarium gemmiperda* ... 510
Peas—
stemrot and rootrot caused by *Fusarium* spp. ... 459–476
varieties, resistance to *Fusarium* ... 471–472
Pectinase, production and acidity of *Rhizopus* spp. ... 369–370
Pelargonic acid from rancid fats, examination ... 326, 328
Penicillium spp., penetration into wood, studies ... 220, 224–227
Perilitus elcodis, parasite of false wireworm ... 562–563
Peroxid hydrogen, relation to Kreis test for rancidity ... 333–334
Phaseolus vulgaris, seedlings growth, relation to temperature and weight of seeds ... 537–539
Phloroglucin, colored condensation products, and spectroscopic comparison ... 334, 336–338
Phthorimaea—
glochinella, description, distribution, habits, and natural control ... 567–570
operculella similarity to *P. glochinella* ... 568–569
Physiological Effect of Glysspol: Paul Menaul ... 233–242
Pigs, feeding cottonseed meal experiments ... 9

Plant— Page
roots, carbon absorption by ... 303-311
tissue, tannin content, quantitative estimation methods ... 257-258
Plants—
injury by arsenicals, description and causes, discussion ... 191-192
juices of, cryscopic readings ... 245, 246, 247, 251, 253, 256
Poison, cottonseed meal—
effect of autoclaving, experiments ... 9-10
due to gossypol ... 233-237
Pomeroy, C. S., Shamel, A. D., and Caryl, R. E.: Bud Selection as Related to Quantity Production in the Washington Navel Orange ... 319-322
Potassium—
absorption by plants, relation to sodium nitrate ... 309
losses from soils by weathering ... 115
Potassium chlorid, effect on soil acidity and calcium content ... 91-114, 118
Potato—
plant juices, osmotic pressure ... 245-256
tuber moth, importance similarity to eggplant leaf miner ... 567, 568, 569
Power, Frederick B., and Chesnut, Victor K.: Chemical Examination of "Chufa," the Tubers of *Cyperus esculentus* Linné ... 69-75
Powick, Wilmer C.: Compounds Developed in Rancid Fats, with Observations on the Mechanism of Their Formation ... 323-362
Preparation and Properties of Colloidal Arsenate of Lead: F. J. Brinley ... 373-374
Progeny tests and records from bud variations of navel orange ... 319-322
Protoparce spp. (hornworms) ... 477-486
Puccinia graminis tritici, Forms III and XIX, cytology ... 571-604
Quantitative Determination of Carotin by Means of the Spectrophotometer and the Colorimeter: F. M. Schertz ... 383-400
Ragsdale, A. C., and Turner, C. W.: The Minimum Milk Requirement for Calf Raising ... 437-446
Rancidity studies ... 323-362
Red Stain in the Wood of Boxelder: Ernest E. Hubert ... 447-458
Refrigeration, indoor plant, construction and arrangement ... 184-186
Rhizopus nigricans—
strains, parasitic on sweet potato ... 364-365
variations ... 363-371
spp., pectinase production and acidity ... 369-370
Riker, A. J.: Some Morphological Responses of the Host Tissue to the Crowngall Organism ... 425-436
Roberts, John W.: A Budrot of the Peach Caused by a species of *Fusarium* ... 507-512
Robinson, R. H.: Action of Sodium Nitrite in the Soil ... 1-7
Rootrot—
control possibility ... 416-417
cotton, habits of ... 405-418
peas—
caused by *Fusarium* spp. and stemrot ... 459-476
development, environmental factors ... 465-468
persistence in soil, causes ... 469-471
recurrence during successive years ... 412-414
spread methods, and comparison with other organisms ... 406, 412-416
udo, cause, description, and control ... 271-275
Roots, plant, carbon absorption ... 303-311
Rosette, wheat—
control by uses of immune varieties ... 269-270
intracellular bodies associated with ... 605-608
varietal resistance ... 261-270
Rot, sweet potato, caused by *Rhizopus nigricans* ... 363-365
Rubbish on fields, burning to control false wireworm ... 564-565
Rudolfs, Willem: Influence of Temperature and Initial Weight of Seeds upon the Growth-Rate of *Phaseolus vulgaris* Seedlings ... 537-539
Runner, G. A., and Bliss, C. I.: The Three-Banded Grape Leafhopper and Other Leafhoppers Injuring Grapes ... 419-424
Rush nut ... 69-75

Rusts— Page
grain, biologic forms studies ... 571-572
infection methods ... 594-598
St. George, R. A., and Wade, J. S.: Biology of the False Wireworm *Eleodes suturalis* Say ... 547-566
St. John's disease, peas in Holland, records and cause ... 461-462
Sap, plant, reaction to culture solutions ... 308
Sapsuckers, spread of red stain fungus ... 455
Sarcina lutea, destruction by chlorin, tests ... 379, 382
Saunders, A. R., and Miller, Edwin C.: Some Observations on the Temperature of the Leaves of Crop Plants ... 15-43
Scald, apple—
control by oiled wrappers, oils, waxes ... 531-536
critical periods in development ... 533-536
Schertz, F. M.: The quantitative Determination of Carotin by Means of the Spectrophotometer and the Colorimeter ... 383-400
Schiff test for rancidity ... 324, 332
Schoening, Harry W.: A Study of the Serology, the Cerebrospinal Fluid, and the Pathological Changes in the Spinal Cord in Dourine ... 497-505
Sclerotinia—
libertiana, effect on cell walls of plants ... 595, 598
sp., cause of udo disease, studies ... 272-275
Sedge oil ... 77-82
Seed, wheat, treatment for control of false wireworm, experiments ... 564
Seedlings, bean, growth-rate relation to temperature and weight of seeds ... 537-539
Seeds—
bean, weight and temperature effect on growth of seedlings ... 537-539
spurge nettle, description and chemical analysis ... 259-260
Septicemia—
cutworm ... 487-496
hornworm ... 477-486
Serum, tests for dourine ... 498-499
Shade, effect on osmotic pressure in plant juices ... 252, 253, 255
Shade trees, protection from red stain fungus ... 455-456
Shamel, A. D., Pomeroy, C. S., and Caryl, R. E.: Bud Selection as Related to Quantity Production in the Washington Navel Orange ... 319-322
Sheep—
feeding cottonseed meal experiments ... 10
poisoning with gossypol ... 236
Silkworm—
cutworm septicemia in ... 488, 490, 495
hookworm septicemia in ... 482-485
Simmons, Perez, and Larson, A. O.: Notes on the Biology of the Four-spotted Bean Weevil, *Bruchus quadrimaculatus* Fab ... 609-616
Smith, C. M.: Excretions from Leaves as a Factor in Arsenical Injury to Plants ... 191-194
Snyder, Thomas Elliott, and Dietz, H. F.: Biological Notes on the Termites of the Canal Zone and Adjoining Parts of the Republic of Panama ... 279-302
Sodium—
hypochlorite, action as germicide for milk ... 376-381
nitrate, solutions, effect on potassium absorption ... 309
nitrite, action in the soil ... 1-7
soil losses of by weathering ... 115
Soil Reaction in Relation to Calcium Adsorption: C. O. Swanson ... 83-123
Soils, acidity and alkalinity, methods of measurement ... 82-114
origin, causes, measurements ... 83-119
classifying by auxotaxic curve ... 11-13
conditions—
effect on rootrot of cotton and alfalfa ... 409-411
relation to persistence of *Fusarium martii* ... 469-471
sodium nitrite action ... 1-7
swelling, auxotaxic curve, means of classifying and studying ... 11-13
temperature—
relation to wheat infection by *Helminthosporium sativum* ... 195-218
relation to rootrot of peas ... 465-468
treatment for control of false wireworm ... 564
Some Factors Which Influence the Feathering of Cream in Coffee: L. H. Burgwald ... 541-546

Page

Some Morphological Responses of the Host Tissue to the Crowngall Organism: A. J. Riker 425-436
Some Observations on the Temperature of the Leaves of Crop Plants: E. C. Miller and A. R. Saunders 15-43
Some Physiological Variations in Strains of *Rhizopus nigricans*: L. L. Harter and J. L. Weimer 363-371
Sorghum—
blight, description and comparisons 157-158
tannin determinations 258
South Dakota, false wireworms in 550
Spectrophotometer, description and use in carotin determination 384-387, 393-394
Spectrophotometric observations of solutions of oleic acid products 352-355
Spinal cord, changes in dourine 502-504
fluid, tests in dourine 499-502
Spleen, horse, iron content of in infectious anemia, of 239-242
Sporotrichum globuliferum, attacking false wireworms 561
Spraying, grape leafhopper 424
Spurge nettle seed, description, chemical analysis 259-260
Staining molds, in studying penetration 221-223
Staphylococcus pyogenes aureus, destruction by chlorin tests 379
Starch content of chufa tubers 72-73
Starch-iodid, test for free chlorin 377
Stem and Rootrot of Peas in the United States Caused by Species of Fusarium: Fred Reuel Jones 459-476
Stemrust of wheat, cytology of 571-604
Storage apples, experiments with oil wrappers to control scald 513-536
Stripe, bacterial, disease of proso millet 151-160
Study of the Serology, Cerebrospinal Fluid and Pathological Changes in the Spinal Cord in Dourine: Harry W. Schoening and Robert J. Formad 497-505
Substance K, isolation in rancidity studies, notes 338, 342-346, 348, 355-357, 360
Substance R, isolation in rancidity studies, and formation mechanism 349-352, 356-358, 360
Sugar, loss from beets during storage 126-149
Swanson, C. O.: Soil Reaction in Relation to Calcium Adsorption 83-123
Sweet potato—
destruction by termites 290
inoculation with *Rhizopus nigricans* strains 364-365
Tannin in plant tissue, quantitative estimation of 257-258
Temperature—
charts, indoor refrigeration plant 186-187
in leaves of crop plants 15-43
relation to germination of *Rhizopus nigricans* strains 365-369
soil, relation to wheat infection by *Helminthosporium sativum* 195-218
Termites—
classification, description, and habits 281, 285-300
nests, descriptions 284, 289, 292, 294-5, 296, 298
nonsubterranean, control 301
of the Canal Zone and Panama, biological notes on 279-302
subterranean, control 300-301
swarming habits 287, 289, 290, 291
winged, pest in Canal Zone 288, 290, 300
Testing beets for sugar content 125-126
Texas, false wireworms 550
Thermostat for control of low temperatures 183
The Three-Banded Grape Leafhopper and Other Leafhoppers Injuring Grapes: G. A. Runner and C. I. Bliss 419-424
Tiles, crushing by swelling soils 13
Time for Testing Mother Beets: Dean A. Pack 125-150
Tip burn, potato, relation to osmotic pressure of juices 250, 251, 253, 255
Tobacco worm, septicemia in 477-486
Tobacco splitworm, importance, and similarity to eggplant leaf minor 567, 568, 569
Tomato, crowngall, histological studies 425-430
Tomato worm, septicemia in 477-486
Toxicity of cottonseed meal—
autoclaving for 9-10
due to gossypol 233-237

Page

Trapping false wireworms 564
Trees, mold penetration in 219, 223-227
Trombicula cinnabaris, adult form of common chigger 402
Trombicula tlalzahuatl, common North American chigger 401-402
Trypanosoma equiperdum, cause of dourine, use in tests 498
Tumor, apricot 45-60
